## Checklist 6

This checklist provides administrators and educators with an efficient inventory of what empirical research and best practice suggests as important considerations when evaluating the status of a school's ability to effectively intervene with a student potentially at risk for suicidal behavior. This checklist can be used to quickly evaluate what services and policies your school already has in place (indicated by a "yes") or what services and policies your school may be lacking that may need to be implemented or revised (indicated by a "no"). This checklist corresponds to Issue Briefs 6a, 6b, and 6c, which provide a more in depth and detailed discussion concerning intervention strategies. The intent of the Issue Briefs are to provide research-based and best-practice suggestions for how a school may wish to address the issue of intervening with a student potentially at risk for suicidal behavior. The intention of the Issue Briefs are not to provide definitive declarations for what schools should decide to do specifically but present what research suggests as effective ways to intervene; we assume that each school will vary in their ability to implement and maintain suggestions mentioned in the Issue Briefs.
