Checklist 5

This checklist provides administrators and educators with an efficient inventory of what empirical research and best practice suggests as important considerations when evaluating the status of a school’s suicide prevention program. This checklist can be used to quickly evaluate what services and policies your school already has in place (indicated by a “yes”) or what services and policies your school may be lacking that may need to be implemented or revised (indicated by a “no”). This checklist corresponds to Issue Brief 5, which provides a more in depth and detailed discussion concerning particular prevention guidelines and issues mentioned in this checklist. The intent of the Issue Brief is to provide research-based and best-practice suggestions for how a school may wish to address the issue of adolescent suicidal behavior and what research suggests about each strategy available to schools. The intention of the Issue Brief is not to provide definitive declarations for what schools should do because each school will vary in their ability to implement and maintain suggestions mentioned in the Issue Brief.

Yes No
☐ ☐ Does your school have written policies and procedures in place to effectively respond to students who may be at-risk for suicidal behaviors and/or thoughts?
☐ ☐ Does your school have established collaborative relationships with community agencies, such as crisis centers or mental health centers?
☐ ☐ Does your school provide training for all school personnel about suicide prevention?
☐ ☐ Does your school have an established in-school response team that is qualified to respond to a student potentially at-risk for suicidal behaviors and/or thoughts?
☐ ☐ Does your school provide opportunities for parents to become involved in the suicide prevention practices and activities your school provides?
